07:30	257	123	134	9	18.9	43	101	101	177
07:45	255	115	140	5	17.0	38	72	88	147

## Features :-

- Instant lift failure notification for fastest possible repair.
- Direct indication of the misuse of fire and independent service.
- Verification of lift performance by reporting waiting times by floors or time of day, short term, or averaged over years.
- Direct assessment of the effects of having a lift out of service, allowing optimised lift use.
- Long term lift availability reporting is an indicator of maintenance quality.
- All report data is available to other Windows applications for inclusion in management reports.
- Integrated tenant directory editing, and automatic uploads to car screens.
- Central time and date reference for car displays.
